

## ALBERTA SUSTAINABLE RESOURCE DEVELOPMENT

### **Mission Statement:**

*To ensure the sustained contribution of benefits to Albertans from Alberta's public land and wildlife resources.*

### **Vision Statement:**

Alberta's public lands, forest, rangelands, fish and wildlife resources are managed within a policy, administrative and regulatory framework that benefits both present and future Albertans.

The role of this Alberta Government department is committed to the wise use and conservation of fish and wildlife resources. Alberta Sustainable Resource Development (ASRD) encourages balanced and responsible use of Alberta's natural resources through the application of leading practices in management, science, and stewardship. It is essential that the intrinsic value they add to the environment be preserved for the enjoyment of all Albertans.

### On public lands:

- promote good stewardship;
- manage leases for both forested and agricultural areas; and
- co-ordinate access by industry and for recreational use.

### Forests:

- enhance the social and economic benefits of our forests and forested lands;
- oversee forest industry development;
- monitor the export of forest products;
- administer forest revenues and new timber allocations; and
- support a full range of uses and values including timber production, wildlife habitat and recreation.

### Fish and Wildlife:

- manage, conserve and allocate fish and wildlife resources;
- protect fish and wildlife through legislation, regulation and enforcement; and
- manage programs for anglers, hunters and trappers.
